

eGuardian Appoints Robert Patrick as Chairman of the Board

ONTARIO, Calif., Nov. XX, 2008 – eGuardian, the only online protection service to block predators effectively and make search engines and social networking sites safer for children, today announced that co-founder and chief technology officer (CTO), Robert Patrick, has been named Chairman of the Board.

As Chairman of the Board, Patrick is responsible for presiding over the board meetings and driving the long-range vision of eGuardian. He maintains his role as CTO, responsible for developing and implementing new technology and contributing strategies to further the company's business initiatives.

"I am honored to be elected Chairman of the Board and look forward to working with the board members to achieve our long-term goals," said Patrick. "As Internet adoption among children continues to soar, eGuardian remains committed to developing innovative services to help keep kids safe online."

In addition to Patrick, eGuardian board members include Ron Zayas, co-founder and chief executive officer of eGuardian, Stephen Block, vice president of Tech Coast Angels, and Mary Russell, president of the Hamilton Group.

eGuardian works in conjunction with parental controls, content filters and site blockers to deliver a deeper layer of protection. Unlike systems that restrict access, eGuardian enhances your children's online experience by allowing them to safely join popular community websites without exposing them to online predators and adult content.

About eGuardian

eGuardian is a child's constant companion on the Internet. Based in Ontario, Calif., the company's technology provides an innovative new solution that allows partners to block contact with online predators and filter out adult content without hindering a child's learning, social networking and exploring opportunities.
